## ABSTRACT

I'm a master degree IT professional mainly focused on backend systems and operations, with a deep background in software development and automation. I enjoy clean, documented and tested code, and keep reading and learning about new technologies. I'm passionate about what I do and can work readily either alone or within a team. I don't fear of talking in public or taking responsibilities, as I consider myself to have good leadership skills. I'm also able to provide advance technical support and be ready to react to an emergency whenever it comes up.

## WORK EXPERIENCE

### **dotCloud Inc.** (Berlin, Germany)

Software Engineer and Operations, August 2014 - present

- ▶ Bootstrap a PaaS from scratch to +2000 users based on the already existing cloudControl PaaS
- ▶ Operate and orchestrate an underlying infrastructure based on Google Compute Engine
- ▶ Development of new backend components such as MySQL instances provisioning, ops automation tools or migration scripts
- ▶ Adapt the existing cloudControl's Python CLI to dotCloud
- ▶ Document all migration steps from old dotCloud to new platform
- ▶ Provide technical support to existing customers
- ▶ Join a regular on-call schedule using PagerDuty

### **cloudControl GmbH** (Berlin, Germany)

Software Engineer and Operations, August 2012 - present

- ▶ Implementation of software services, components and REST APIs in multiples languages and frameworks: Python, Django, Java, Ruby, Sinatra, PHP, Go
- ▶ Management and orchestration of an underlying infrastructure based on Amazon AWS using tools like Opscode, Chef, Hubot or in-house bootstrap scripts
- ▶ Monitor platform health using services like Pingdom, New Relic, Serverdensity or Logentries
- ▶ Heavy use of Git as VCS, branch-based features development and code reviews via Pull Requests
- ▶ Maintenance of several open source projects like cloudControl's Python CLI, Python or Go API libraries
- ▶ Implementation and scaling of load balancers routing layers, based on nginx, Varnish, Redis and WebSockets
- ▶ Handle thousands of logs using MongoDB and rsyslog
- ▶ Integrate internal components' deployment with CI services like Jenkins or TravisCI
- ▶ Write technical and non-technical platform documentation and sample apps in multiple languages
- ▶ Join a regular on-call schedule using PagerDuty

### **Repsol S.A.** (Madrid, Spain)

Software Engineer Intern on Refining Dept., October 2011 - March 2012

- ▶ Be involved on big projects between Repsol and third party contractors
- ▶ Analysis of incoming data from refining stations using SQL
- ▶ Learn about software engineering and management within a big corporation
- ▶ Take part of an official course about leadership

### **Consorcio Regional de Transportes (Public Company)** (Madrid, Spain)

Technical Intern on Commercial Dept., July 2011 - September 2011

- ▶ Data analysis using Visual Basic for Applications

## EDUCATION

**Universidad Complutense de Madrid** (Madrid, Spain)

IT Engineer Master Degree, 2004 - 2012

**Philipps-Universität Marburg** (Marburg, Germany)

Computer Science Erasmus Student, 2009 - 2010

## TECHNICAL SKILLS

**Programming languages:**

- Advanced level: Python, Go, Bash
- Intermediate level: Ruby, Java, PHP, JavaScript, C
- Amateur level: C++, Haskell, Scala, Erlang

**Git**

**Operating Systems:** Unix systems, Ubuntu, Debian

**Databases:** \*SQL, MongoDB, Redis, Memcached

**Infrastructure:**

- Amazon AWS: EC2, Route53, S3, RDS, CloudWatch, SQS
- Google Cloud Engine: Cloud, Storage, SQL

**Continuous Integration/Deployment:** Jenkins, TravisCI, drone.io, Coveralls

**HTTP:** nginx, nginx-lua, Varnish, Pound, Hipache, WebSocket, SSL/TLS

**Ops:** LXC, Supervisor, Chef, Hubot, ssh, scp, DNS, Unix, Vagrant, Docker, cron, OpenVPN

**Monitoring:** Pingdom, New Relic, Serverdensity, Logentries, PagerDuty

**Documentation:** Markdown, Google Docs

**Software Engineering:** Agile methodologies, TDD/BDD, Kanban, Scrum, Extreme Programming, Software Craftsmanship

## OPEN SOURCE

**oscillatingworks:** currently bootstrapping an independent open source organization - <http://oscillating.works>

**cctrl:** cloudControl command line utilities - <https://github.com/cloudControl/cctrl/commits/master?author=fern4lvarez>

**gocclib:** Go library for the cloudControl API - <https://github.com/fern4lvarez/gocclib>

**goduckgo:** Go package for DuckDuckGo API - <https://github.com/ajanicij/goduckgo>

**gs3pload:** Upload files to multiple S3 or Google Storage buckets at once - <https://github.com/fern4lvarez/gs3pload>
